

Centaur Hot Roller laminator

AUSTRALIAN DESIGNED & MADE

Emseal proudly presents another first - the Centaur Hot Roller laminator. With over twenty years of manufacturing experience, we are about to launch a new concept in hot roller technology.

The Centaur hybrid hot roller laminator combines the best features of hot shoe and hot roller technology. A hot roller at the top provides perfect scratch free finishes, while the hot shoe at the bottom regulates temperature and allows higher continuous feed throughput than the normal twin hot roller systems.

Simple but ruggedly designed mechanical and electrical systems reduce time lost to maintenance and repairs. The Centaur laminator can also be used as a pressure sensitive laminator.

Features:

- Australian designed and manufactured
- Variable speed.
- Australian made tangential fans for cooling.
- Rear cut off knife.
- Emergency cut off switch.
- Can use thermal or pressure sensitive laminates (requires optional rewind).
- Australian Communications Authority approval
- Year warranty on all parts.
- All steel chassis construction
- Drop down idler bars -top and bottom.
- Reliable mechanical thermostat. We have used these for many years, they are known to last for over 20 years without a problem.
