

Economy Monomeric Cold "P.S.A" Film Data Sheet

Finishes Available:	Gloss
Description:	100micron. (PVC) self adhesive applied.
Features:	Cold "P.S.A" laminating film is a good value short term monomeric product, it is easily applied and can be used on automatic cold laminators. The stable attributes of these films render excellent protection against moisture, air born pollutants, scratches and abrasions.
Advantages:	Long term indoor and short term outdoor; (depending on exposure) excellent adhesion to graphic media; impeccable transparency.
Specification:	a) Composition: monomeric calendared Cold "P.S.A" PVC b) Thickness of film: 0.75mm c) Softness: 28PHR
Release Liner:	a) 80gsm one side PE treated premium paper, one side siliconized b) Release strength: 15g/inch
Solvent Acrylic Pressure Sensitive Gelatin, Permanent/Adhesive:	a) Adhesive thickness: 25mic b) Stick on SUS 20 min. peel off strength: 980/25mm c) Stick on glass 20min. peel off strength: 740/25mm d) Stick on lacquer 20min. peel off strength: 700/25mm
Shelf Life:	12 Months
Shrinkage:	2% without printed ink, short term outdoor use.
Special Note:	Solvent inks corrode both vinyl and gelatin which may lead to abnormal shrinkage of vinyl. Solvent printouts are not recommended to be laminated by this product.
Storage Conditions:	Keep all finished rolls in horizontal position, avoid direct sun light. Recommended storage temperature 15-25 degrees Celsius and 35-65% relative humidity.
Availability:	Immediate ex Melbourne Warehouse
