

Foamcore

Foam core is a very strong, lightweight and easily cut material useful for backing, mounting photographic prints, or framing. It is made by adhering two sheets of paper to both sides of a foam core, and comes in either white, black or self adhesive. Foam core board is lightweight yet sturdy. It is ideal for all indoor mounting applications is easy to cut and customize, and is great for trade shows.

The best way and safest way to cut foam core is to use a trimmer, like the Sabre trim.

If you would like to know more about form core or the Sabre trim please either use our contact form, or phone Craig Gray on 0409 484 271
